

Public Engagement Session

Feedback Form for West Moberly First Nations Phase 1 TLE

Outstanding Lands Selections

June 2026

- 1) Treaty Land Entitlement (TLE) land transfers make up for lands that should have been provided as part of Treaty 8 over 100 years ago.
- 2) West Moberly First Nation's TLE Agreements commits to an amount (quantum) of Shortfall Lands and a quantum of Additional Lands to be transferred. Since West Moberly First Nation did not select the entirety of their Additional Lands quantum, the Nation has selected this package of "Outstanding Lands" towards fulfillment of their Additional Lands quantum.
 - The Province is interested in hearing your interests and concerns about proposed land transfers.
 - Public interests will be considered and where possible may be mitigated or addressed.

Download the PDF comment form and either fill out digitally or print out and fill out by hand. Please make your comments as clear and concise as possible. Comments left blank will be interpreted as of no interest or concern.

Note: Access is an important consideration in these land transfers. We work to ensure public access remains through or around parcels. Key routes, such as highways, Forest Service Roads, and other types of access to surrounding Crown lands, are reviewed and may be excluded where appropriate to maintain reasonable public access. Public feedback also helps to inform how these areas are accessed.
