Subject: Against the New Water Act

To whom it may concern,
Just a quick note to express that my family and I stand on the side against the new Water Act Modernization.
When are we going to see changes that are good for our BC families, and not only for US corporations?

Al Gore said it right in his movie, he quoted: "by doing the right thing, we move in the right direction".
We all know this is not the right thing for our long term future, only short term financial gains.

Sincere regards,
Louis Seguin
