A Water Sustainability
Act for B.C.
By the B.C. Government.

Re: Being a water user. I wish to provide Feed back on proposed new water legislation.
Retain First In Time, First In Right model of Licensing.
Ensure agriculture, s water needs are given priority over other users.
Secure livestock access to water sources on private and Crown land.
Recognize and allow unrecorded use by livestock.
Oppose water metering.
Invest in water storage infrastructure.
Encourage water conservation incentives and funding for irrigation upgrades.

Being a user of water out of Monte Creek for 40 years. Which was a fresh water creek. Where Duck Unlimited were allowed to put a Dam. Creating a swamp. Causing the creek to be no longer a clean creek. During flood time I get a great amount of debris. Plugging my pump.

P.S. The amount of water coming in and heavy vaporization of water over such a large area. I want to know how much water is lost. Water Right Department in Kamloops were suppose to do a water right avaluation of the amount of vaporation on Ducks Unlimited, Duck Meadows swamp. The Gentleman responsible for this is Bruce McFarland. Also on Robin Creek: Note on Robin creek they are going to change the creek back to the old source. The present sight has been there 40 years. The cost would be \$50,000 and all they have to do is go down the valley and alter the second diversion. For one tenth of the cost.

Yours truly:

H.C.Flatt-Flatt Ranch
